Description

We think of this creation as an Indigenous pathway – complementary to the national strategies – allowing Indigenous stakeholders to formulate their own response to the syndemic in their communities by incorporating local governance and Indigenous knowledge. We encourage the Indigi-HAS as a process-based roadmap for all stakeholders to guide the development of policies, services, programs, initiatives, and other actions to achieve the nation's vision of ending the syndemic by 2030.

Learning Objectives

- Introduce indigi-HIV/AIDS Strategy (HAS).
- Inform on goals and objectives of indigi-HAS.
- Identify indigi-HAS alignment with existing national strategies.
